

I AM THE NCR P1530 POS Terminal

Reliable, relevant POS terminal developed to meet the industry's requirements

The NCR P1530 is the newest product within NCR's mainstream line of POS terminals for the restaurant and foodservice industry. The highlights of its open platform include a highly-efficient Intel Atom processor for greater performance, a bright XGA LED color main display with a resistive or surface capacitive touch screen, lower power consumption and a reliable, stylish design. The mainstream POS terminal has been engineered and manufactured to provide sustainability, non-stop reliability, maximum uptimes and a low total cost of ownership.

Serve customers faster

The P1530 combines superior processing power with top reliability. Increase your speed of service without sacrificing ease of use for your staff.

Gain product stability

By using Intel's embedded processor family, the P1530 will be a stable product you can use for many years, unlike the traditional consumer devices that have short processor life spans. This provides a consistent configuration which is critical for rollouts that might last several years.

Install it anywhere

Our terminals can be used and mounted anywhere you need them, with rugged enclosures, fanless configurations and solid state technology that can withstand spills without interrupting service.

Why NCR?

NCR Corporation (NYSE: NCR) is the global leader in consumer transaction technologies, turning everyday interactions with businesses into exceptional experiences. With its software, hardware, and portfolio of services, NCR enables nearly 550 million transactions daily across the retail, financial, travel, hospitality, telecom and technology industries.

NCR solutions run the everyday transactions that make your life easier. NCR is headquartered in Duluth, Georgia with over 29,000 employees and does business in 180 countries. NCR is a trademark of NCR Corporation in the United States and other countries.

Connect to everything

Several connectivity options are offered, including four or six powered RJ12, three standard USB, one powered USB 12V and more. Connect directly to all of the devices you need to serve your customers quickly and at low cost.

Add displays to engage your customers

Our 2x20 and 7" widescreen customer displays enable your customers to view orders and increase order accuracy. Display advertising, promotions and specials can also capture your customer's attention at the time of purchase.
